

CDM (2015) Awareness

Course Introduction

With increasing demand from construction clients searching for advice with regards to updated Construction Design Management (CDM) Regulations, Alpha Safety has designed this 3-hour awareness course to clarify important changes and how they will affect you.

The regulations changed in April 2015 there has been some confusion as to their interpretation which can lead to legal action through non-compliance.

Course Topics

- Duty Holders & their Responsibilities
- Safety Responsibilities
- Legal Requirements & Mandatory Documentation
- Notification Requirements
- The Construction Phase Plan
- Case Studies

Course Benefits

Delegates completing the course will have a clear understanding of what is expected of them from CDM (2015) and have the confidence to meet the regulatory requirements. Advice on specific projects or concerns may be highlighted which our professional training staff will help you to address.

Qualification Expiry

1 Year
