

IOSH Managing Safely Refresher

Course Introduction

This practical and engaging one-day course refreshes knowledge on key parts of Managing Safely with emphasis on a Plan-Do-Check-Act safety and health management system.

Managing safely is a flexible course for managers and supervisors in any sector, in any organisation. It brings managers up to speed on the actions they need to take to handle health and safety in their teams.

This refresher is aimed at those that already hold a Managing Safely Certificate that wish to refresh their skills. As the qualification has been available for decades it is becoming common practice for those that completed the qualification years ago to use this up-to-date course to re-qualify, enhancing their continuous professional development.

Managing safely won't turn learners into health and safety experts but it will give them the knowledge and tools to tackle the health and safety issues they're responsible for. Importantly, it brings home why health and safety is such an essential part of their job.

Course Pre-Requisites

Candidates must already hold a valid IOSH Managing Safely Certificate.

Course Topics

- Intro to Managing Safely
- Assessing Risks
- Controlling Risks
- Understanding your Responsibilities
- Identifying Hazards
- Accident & Incident Investigation
- H&S Performance Management

Course Benefits

All Managers are responsible for their employees' health and safety and providing a safe working environment. This qualification will provide up-to-date guidance on how to do just that and outline what actions should be taken by managers to avoid health and safety pitfalls they probably never even considered.

For managers that completed this qualification many years ago, it is the ideal course to refresh and update their knowledge and skills, put managing safely into action and build on existing capabilities.

BUSINESS BENEFITS:

- Greater productivity – fewer hours lost to sickness and accidents
- Improved organisation-wide safety awareness culture and appreciation of safety measures
- Active staff involvement to improve the workplace
- Internationally recognised certification for managers and supervisors
- Enhanced reputation in the supply chain

Assessment Method

22 Questions, Short Answer Exam & On-Site Risk Assessment
