

HABC Level 2 Control of Substances Hazardous to Health (COSHH)

Course Introduction

COSHH training will make it easy for all staff to understand what they must do and how to recognise the different types of hazardous substances.

Course Topics

- The purpose of COSHH in the workplace
- Completing a COSHH Assessment
- Typical COSHH Hazards & Risks
- Effects of Various Substances on Humans
- COSHH Regulations & Their Application
- Symbols used in Marking Chemicals
- Emergency Procedures

Course Benefits

The Control of Substances Hazardous to Health regulations 2005 requires that all members of staff that come into contact with a potentially hazardous substance, to be trained the safe methods for handling and cleaning up the substance. This can be something simple like bleach, or a more potent chemical like hydrofluoric acid. This course will allow you to evidence that such training has been completed.

The awarding body Highfield issue all certificates via PDF format. This will be emailed to the course booking contact on successful completion of the course, once received from Highfield.

Qualification Expiry

3 Years
