

Autism Awareness

Course Introduction

Autism spectrum disorder, a developmental disorder characterized by persistent problems in social communication and interaction, along with restricted and repetitive patterns of behaviour, interests or activities. This course shall provide the learners with the necessary knowledge and understanding of autism spectrum disorder

Course Topics

- What is autism and who is affected
- Characteristics
- Mental Health and Autism
- How it is diagnosed and how to support them
- Statistics
- Myths and Facts
- Types of Autism
- Conditions associated with Autism
- Communication
- Where to seek help and support

Course Benefits

Just like Mental Health there is a lot of stigma that surrounds individuals who suffer from an Autism spectrum disorder. This course shall give learners the facts and knowledge to support those individuals on the ADS spectrum

Assessment Method

Multiple Choice

Qualification Expiry

1 Year
