PASMA Towers for Users

Course Introduction

The PASMA Towers for Users course is designed to teach individuals how to successfully assemble, dismantle, alter, move and inspect mobile access towers through both classroom and practical training sessions.

Many clients and principal contractors in the construction, engineering and manufacturing industries now stimulate that anyone using mobile towers in any capacity holds a PASMA certificate. This means that as well as helping to safeguard yourself and employees from injury, with this accredited training complete, it also provides avenues to work with a wider client base.

A PASMA PhotoCard will be issued to successful delegates who complete the theory and practical sessions.

Course Topics

- Legislation (Regulations and Guidance affecting working at height with mobile access towers)
- PASMA Code of Practice;
- Product Standards EN 1004-1 (2020)
